SKILLS

Python 2.5+ yrs
Computer Vision (CV) 1.5+ yrs
Medical Imaging in C.V. 1.5+ yrs
Explainable AI (XAI) in C.V. 1.5+ yrs
Few shot and Zero Shot Learning in C.V. 1.5+ yrs
Generative Adversarial Networks (GANs) in C.V. 1.5+ yrs
TensorFlow and Py-Torch 1.5+ yrs
Oracle and PostgreSQL 1.5+ yrs

JAYAN GHIMIRE

Python Developer - Leapfrog Technology
Assistant Lecturer - Kantipur Engineering College

EDUCATION

Undergraduate - Computer Engineering 2019 - 2024
Khwopa College of Engineering (Institute of Engineering) - Nepal
Passed with 75.98%

WORK EXPERIENCE

Python Developer 2024 - Present
Leapfrog Technology, Kathmandu, Nepal
Responsible for writing Python scripts for core business logic , contributing to an enterprise-level software system for a U.S.-based financial company.

Assistant Lecturer 2025 - Present
Kantipur Engineering College, Lalitpur, Nepal
Teaching Probability and Statistics, Core Computer Programming and Numerical Methods to undergraduate engineering students. Designing assessments and engaging in departmental academic activities.

RESEARCH PAPERS

Few-Shot Localization and Anomaly Detection in Medical Images via Prompt-Tuned CLIP Using Healthy-Only Training for Diverse Clinical Modalities Medical Imaging
[Click here to view PDF](#)

Reimplementing TransUNet: A Ground-Up Approach to Medical Image Segmentation with Transformers and CNNs Medical Imaging
[Click here to view PDF](#)

Explainable AI in Multiclass Brain Tumor Classification: Comparative Analysis of CNN Architectures Using Gradient-Based and Perturbation-Based Methods Medical Imaging
[Click here to view PDF](#)

TransExplain: Unified Fine Grained Explainability for Vision & Language Transformers Explainable-AI (XAI)
[Click here to view PDF](#)

ARM-Net: Adaptive Radiance Modulation for Low-Light Enhancement GANs
[Click here to view PDF](#)

CLIPBridge-GAN: Bridging Prompt Semantics and Image Synthesis via CLIP-Guided Adversarial Training
