SKILLS

Python	2.5+ yrs
Computer Vision (CV)	1.5+ yrs
Medical Imaging in C.V.	1.5+ yrs
Explainable AI (XAI) in C.V.	1.5+ yrs
Few shot and Zero Shot Learning in C.V.	1.5+ yrs
Generative Adversarial Networks (GANs) in C.V.	1.5+ yrs
TensorFlow and Py-Torch	1.5+ yrs
Oracle and PostgreSQL	1.5+ yrs

TESTS

IELTS and GRE
Currently preparing for examination

JAYAN GHIMIRE

Python Developer - Leapfrog Technology
Assistant Lecturer - Kantipur Engineering College

EDUCATION

Undergraduate - Computer Engineering Khwopa College of Engineering (Institute of Engineering) - Nepal	2019 - 2024
Passed with 75.98%	

WORK EXPERIENCE

Current Role: Python Developer Leapfrog Technology, Kathmandu, Nepal	2024 – Present
Responsible for writing Python scripts for core business logic, contributing to an enterprise-level software system for a U.S.-based financial company, First Help Financial . Previously worked as a Java Developer for First Help Financial , and as an Automated Tester for the Ready to Roll project, a luxury vehicle renting company.	
Assistant Lecturer Kantipur Engineering College, Lalitpur, Nepal	2025 – Present
Teaching Probability and Statistics , Core Computer Programming and Numerical Methods to undergraduate engineering students. Designing assessments and engaging in departmental academic activities.	

RESEARCH PAPERS

Few-Shot Localization and Anomaly Detection in Medical Images via Prompt-Tuned CLIP Using Healthy-Only Training for Diverse Clinical Modalities Click here to view PDF	Medical Imaging
Reimplementing TransUNet: A Ground-Up Approach to Medical Image Segmentation with Transformers and CNNs Click here to view PDF	Medical Imaging
Explainable AI in Multiclass Brain Tumor Classification: Comparative Analysis of CNN Architectures Using Gradient-Based and Perturbation-Based Methods Click here to view PDF	Medical Imaging
TransExplain: Unified Fine Grained Explainability for Vision & Language Transformers Click here to view PDF	Explainable-AI (XAI)

ARM-Net: Adaptive Radiance Modulation for Low-Light Enhancement
